

Not just an LMS

A partner on your
learning journey

Enovation

YOUR eLEARNING *partner*

For 20 years, we've been supporting companies and institutions in their digital transformation with Moodle LMS, Moodle Workplace, and Totara.

Certified Premium Moodle and Platinum Totara Partner

Enovation is a trusted, certified partner for Moodle and Totara, with over 500 tailored open-source LMS projects successfully delivered.

Tailored solutions

We create high-performance, user-friendly eLearning environments designed to reflect your unique identity.

Innovation and accessibility

Our intuitive plugins make it easy to create engaging, interactive content – no technical expertise required.

Comprehensive support

From initial design to final training, we're with you every step of the way to ensure your project's success.

— OUR SOLUTIONS

The most popular LMS in the world with 400 million users.

Moodle for business
Customisable enterprise LMS to fit your organisation's unique needs.

Integrated enterprise platform for performance
A complete platform to improve learning outcomes and satisfy compliance at scale.

— YOU BENEFIT FROM

- **An open-source Learning Management System (LMS)** packed with the latest features.
- **A clear, step-by-step process**, to build the eLearning platform that fits your needs.
- **Personalised guidance** at every stage of your project.
- **Tailored training** to help you make the most of your platform.
- **A secure, compliant solution** backed by our ISO 27001* certification and full GDPR adherence.

** ISO 27001 certification and our Information Security Management System (ISMS) provide a best-practice framework for managing information security. This helps organisations protect customer and employee data, manage security risks effectively, and ensure compliance with regulations like the European Union's General Data Protection Regulation (GDPR). OUR SERVICES

Consultancy

We co-create solutions with you, from strategic planning through implementation and ongoing optimisation. Our advice is practical, honest, and grounded in experience.

Training

From mastering your LMS as an administrator to delivering impactful courses as an instructor, we equip you with the skills to create standout learning experiences.

Hosting

Secure, scalable, and stress-free. With ISO 27001 compliance, 99.9% uptime, and expert infrastructure support, our hosting lets you stay focused on what matters, your learners.

Development

Custom-built for your goals, we develop and extend Moodle and Totara to fit your exact needs, seamlessly and securely.

Content Creation

Our learning designers craft compelling, interactive courses using best-in-class tools and pedagogy, always built around your learners.

Support

Responsive. Expert. Always available. Our in-house team supports your platform 24/7/365, so you're never left waiting.

OUR CLIENTS *They trust us*

Education

Public organisations

Private enterprise

Health

Educational power, with over 1,900 plugins available and a dedicated application.

The flexibility of open source

Moodle LMS is a secure, open-source eLearning platform, that offers complete customisation to suit any type of course or teaching method.

The most widely used eLearning system

With over 400 million users worldwide and support for more than 160 languages, Moodle is the go-to platform for organisations seeking to meet their education and training goals.

- ✦ **A wide selection of ready-to-use activities** to create engaging and dynamic training courses in no time.
- ✦ **Seamless integration** with hundreds of platforms via the Moodle API.
- ✦ **AI-powered support** for efficient course and content creation.

Testimonial

PROTECTION CIVILE

"Enovation listened to us right from the start, whether it was for the creation of the platform or ongoing support. Their expertise has enabled us to move to a hybrid training programme that is effective, engaging and perfectly suited to our needs."

Julien Touquoy
Training Director, Civil
Protection Paris Seine

Protection Civile Paris Seine

CONTEXT

Protection Civile is a non-profit organisation governed by the 1901 law, officially recognised as being of public utility and approved as a civil protection body. Its mission is to mobilise all available resources to safeguard civilian populations in times of peace, crisis, or conflict.

The Protection Civile Paris Seine (PCPS) includes 2,000 volunteers who must comply with strict training requirements. Each training course lasts a minimum of five days and must be renewed annually.

Ahead of the 2024 Olympic and Paralympic Games, PCPS faced growing demands and needed an innovative, efficient solution to train its members rapidly while meeting legal obligations.

CHALLENGE

Historically, Civile Protection training was delivered face-to-face — a format that posed several challenges.

Time and staffing

Training sessions required substantial human and material resources.

Limited engagement

A top-down approach (often just PDF-based and lacking interactivity) led to learner disengagement and a higher risk of misunderstanding.

Olympics 2024 deadline

The organisation needed to train 1,200 people in just two and a half months, with a required training duration of four hours per person.

— OUR SOLUTIONS

Moodle LMS: the most widely used LMS globally, trusted by millions in schools, universities, and businesses.

1

Customised open-source platform

Implementation of a tailored open-source LMS, enabling seamless hosting, management, and creation of e-learning content.

2

Interactive content with H5P

Creation of engaging, interactive modules to promote asynchronous learning and learner autonomy.

3

Blended learning model

Transition from a fully face-to-face format to an optimised hybrid approach.

4

Streamlined User Interface

Simplified navigation supported by personalised onboarding and monitoring for smooth adoption.

results

Training capacity doubled

The organisation successfully doubled the number of training sessions delivered in less time.

Time and resource savings

Reduced face-to-face time through online learning, optimising both human and financial resources.

Olympic deadline met

All 1,200 participants were trained on schedule for the 2024 Olympic Games.

Simplified learner management

Digital badges enabled easy tracking of training completion and authorisation management.

Unlock the educational power of Moodle for your organisation

Moodle Workplace is a secure and flexible Learning Management System designed to simplify employee training, onboarding, and compliance processes.

Built for flexibility, it can be tailored to match the size, structure, and specific needs of your organisation—while integrating smoothly with your existing software tools.

Automate routine admin tasks with intelligent features that help you save time, reduce costs, and boost efficiency.

Easily create dedicated learning environments for different teams or departments, with customised access and role-based permissions for each group.

> For more information, see our detailed presentation of our Moodle Workplace solution.

The Moodle solution for businesses and networked organisations:

- ⚙️ Manage multiple entities with user-specific access and compartmentalisation.
- ⚙️ Automate notifications, registrations, certifications, and badges with dynamic rules.
- ⚙️ Visualise and manage your organisational structure, including roles and reporting lines.
- ⚙️ Design fully customised certification courses tailored to your goals.
- ⚙️ Generate personalised follow-up reports to monitor progress and engagement.
- ⚙️ Collect real-time feedback to continuously improve learning outcomes.

Testimonial

ELIS

“Implementing the Moodle Workplace LMS, along with Enovation’s support, enabled Elis to build a true knowledge network. It has since become a key pillar in the group’s growth strategy — fully aligned with our commitment to quality for our clients and workplace well-being for our Elis employees.”

Marcela Ruas
Group HR Development
Director, Elis

Elis

CONTEXT

Elis, a global leader in circular workplace services with 57,000 employees across 500 sites in 30 countries, took a bold step by implementing the open-source LMS Moodle Workplace – in partnership with Enovation.

Far more than just a digital tool, the platform has become a strategic driver: reinforcing the group's core values and supporting employee development across its culturally and professionally diverse workforce.

CHALLENGE

Elis previously relied on collaborative platforms for training, but their impact was limited—especially given the size and global reach of the organisation.

Group scale

Each of the 30 countries in which Elis operates had specific training needs, requiring tailored solutions.

Access to training

Existing systems lacked the structure and efficiency needed for smooth, centralised access to training.

Lack of engaging content

The available tools made it difficult to develop robust, interactive training materials—leading to disengaged learners.

— OUR SOLUTIONS

Moodle Workplace, built for business.

1

Implementation of a Moodle Workplace LMS:

A flexible, scalable platform offering centralised management at the group level, with the ability to customise training for each subsidiary. This ensures consistency while addressing local needs in a structured and coherent way.

2

Powerful content creation tools

From built-in Moodle Workplace features to integrated third-party tools, the platform empowers content creators to deliver targeted training tailored to diverse roles, professions, and regions.

3

Expert support

From start to finish, Enovation's team supported Elis through every stage of their digital transformation.

results

Widespread content creation

Over 40 content creators trained, leading to the development of more than 400 training courses across 11 countries.

A knowledge-sharing ecosystem

Moodle Workplace has become a powerful network for knowledge and skills development, fostering both professional growth and employee well-being.

Faster project delivery

Dedicated training courses have accelerated the rollout of key IT projects, supporting smoother deployments and better adoption.

The LMS for Regulated Environments

Totara is a Learning Management System built for highly regulated industries, providing a fully customisable platform tailored to meet the most demanding compliance requirements.

Whether you're in the public sector, healthcare, education, or manufacturing, Totara helps you do more than just train your teams—it ensures you meet critical regulatory and financial compliance obligations.

From recurring assessments to seamless system integration, Totara adapts to your organisation's needs — regardless of size, structure, or complexity—delivering powerful support for both learning and compliance.

COURTS SERVICE

Customisable enterprise LMS to manage your learning and compliance needs.

- ✦ **Robust compliance and training tools** to enhance security and minimise the risk of non-compliance.
- ✦ **Multi-tenant architecture** to cater to multiple groups or customers from a single instance of your LMS. Streamline the admin experience with branded and isolated user environments.
- ✦ **Support for live and on-demand learning**, including both online and offline events and seminars.
- ✦ **Custom report generation** to monitor learner progress and automate key notifications.
- ✦ **Built-in assessments and certifications** to streamline compliance tracking and reporting.
- ✦ **Mobile training app** for learning anytime, anywhere.

"The partnership with Enovation has transformed the way we deliver training within the Courts Service of Ireland...Enovation has been a trusted partner since 2015, and their ongoing support and innovation continue to add value to our organisation."

Richard Kelly
Training Manager,
Courts Service

Courts Service Ireland

CONTEXT

Founded in 1999, the Courts Service of Ireland is responsible for administering the courts, supporting the judiciary, and ensuring high-quality service for court users.

Until 2021, all training was delivered exclusively in person—limiting both accessibility and flexibility.

Facing a complex hierarchical structure and evolving training requirements, the organisation needed a scalable solution fit for digital transformation.

To meet these needs, Enovation was selected to implement Totara Learn — a high-performance LMS designed to modernise learning delivery across the institution.

CHALLENGE

Modernising training in a structured environment.

- Replacing an outdated LMS that no longer met evolving training needs.
- Simplifying access to learning for all staff.
- Managing complex reporting lines and training hierarchies.
- Aligning the platform with the institution's digital and visual identity.
- Streamlining seminar organisation, including waiting lists and personalised follow-up.

OUR SOLUTIONS

A customised Totara LMS for the Courts Service of Ireland.

- 1 Tailored hierarchies** for smooth access control and detailed reporting.
- 2 Single Sign-On (SSO) integration** for easy and secure platform access.
- 3 Custom interface design** aligned with the department's branding.
- 4 Advanced seminar management** to handle face-to-face training with features like waitlists and participant tracking.

results

Strong user adoption:

Over 1,000 staff members actively using the platform.

Digital shift achieved:

80% of training now delivered online, versus 100% face-to-face previously.

Enriched learning resources:

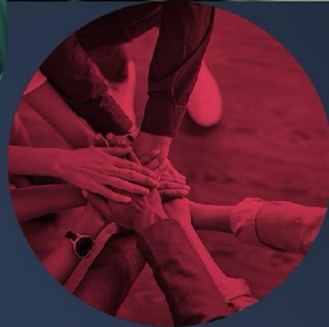

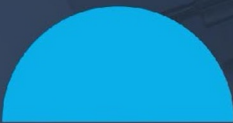

Seamless integration with a third-party content library.

Ongoing collaboration:

A trusted partnership with Enovation since 2015.
